

# Mikka van der Velde

Student at Alfa College

Passionate and versatile programmer born on March 10th, 2006, currently pursuing MBO at Alfa College.

Mikka is deeply involved in open-source projects, interested in languages like TypeScript and more. Beyond coding, Mikka's interests span astronomy, psychology, psychiatry, and literature. A dedicated volunteer, contributing as a Dutch Community Translator for Hypixel and Proton, Mikka is proficient in multiple languages, including Dutch, English, and German.

 Groningen, The Netherlands

## Projects

---

### Dishook

Simple Discord Webhook Wrapper written in TypeScript

**December 2023**

A simple Discord webhook wrapper library that is written in TypeScript available on NPM

<https://github.com/cvyl/dishook>

### JavaScript Terminal website

Website terminal project I did for fun.

**April 2023**

Simple terminal / DOS OS simulator in your web browser! You can visit the Demo at: <https://cvyl.me/terminal>

<https://github.com/cvyl/terminal>

### lgbt.sh Subdomain Service

Free lgbt.sh sub-domain registration service

**November 2023**

<https://get.lgbt.sh/>

### Discord CDN URL Analyzer

This is a simple page where you can view the Discord CDN File's Signature, Issue date, and Expiration date

**December 2023**

<https://cvyl.me/tools/discord/>

### Random username generator

This is a random string/username generator that I created

**January 2023**

<https://cvyl.me/username-generator/>

### French Department Lookup

Lookup French department names by their 2- or 3-digit codes with this simple web app

**March 2023**

This is a simple web application that allows you to look up French department names by their respective 2- to 3-digit codes. It uses jQuery for frontend interaction and JavaScript to perform the department code lookup.

<https://cvyl.me/fr-department-lookup/>

### Lambda Sort in Rust

Simple lambda sort function implementation using the Rust programming language

**November 2023**

<https://github.com/cvyl/rust-lambda-sort>

### Musique

A discord music bot with real-time YouTube searching

**August 2024**

<https://github.com/cvyl/musique>

## Volunteering

---

### Hypixel

Dutch Community Translator

**December 2023 - Present**

<https://translate.hypixel.net/>

### Proton (formerly known as ProtonMail)

Dutch Community Translator

**December 2023 - Present**

<https://localize.proton.me/>

### Crowdin

Translator for open-source projects in different languages.

[My Crowdin Profile](#)

## Publications

---

### Exploring the Decentralized Web with IPFS

Mikka van der Velde

**January 2024**

IPFS is a protocol reshaping the internet. It's a decentralized, peer-to-peer file system that ensures data integrity, resiliency, and resistance. By using cryptographic hashes and blockchain integration, IPFS provides a secure and transparent way to share and store and share content.

<https://cvyl.me/2024/01/20/new-to-web3/>

### Unleashing the Power of CloudFlare's AI Workers

Mikka van der Velde

**January 2024**

CloudFlare's AI Workers allows developers to interact serverlessly with CloudFlare's AI models, providing a simple way to integrate AI into your applications.

<https://cvyl.me/2024/01/21/cloudflare-ai-workers/>

### Automating Deployment for Laravel Using Deployer and GitHub Actions

Mikka van der Velde

**September 2024**

A small guide on setting up automated deployments for Laravel projects using Deployer and GitHub Actions, including staging and production workflows and handling post-deployment tasks like running mig

<https://cvyl.me/2024/09/16/laravel-deployment-automation/>
